

# VIMMS

*Vessel Impact & Motion Monitoring System*

A complete vessel and crew health monitoring solution designed to aid operators and program managers in monitoring, managing and extending the health and wellbeing to both personnel and maritime assets.

- Real-time monitoring of shocks and vibration on crew and vessel
- Feedback to alter course or slow down to reduce WBV exposure
- Visual warning if maximum threshold exceeded, requiring PIN code to reset.
- Monitor crew wellbeing and vessel operations in the VIMMS Console
- Make data driven decisions and forecast potential issues
- Incorporating Microsoft AI to provide performance insight across the fleet

Key metrics make it simple to maintain operational oversight, maximising productivity and increasing wellbeing of staff. VIMMS provides an organisation with an efficient tool to increase their duty of care and meet regulatory targets.
